San Antonio, TX | (210) 835-7312 | lilianafinona3@gmail.com | [Digital Portfolio](#)

EDUCATION

Texas A&M University-San Antonio (TAMUSA) - San Antonio, TX	2022-2026
• Bachelors of Science in Computer Science • Minored in Business Administration • Expected Graduation Date: December 2026	
Palo Alto Community College San Antonio, TX	2019-2022
• Associates of Arts in Liberal Arts • Graduated: 2022	

EXPERIENCE

Texas A&M University-San Antonio - Web Services Team	2022-2026
Student Worker	
• Develop and maintain internal web applications using PHP, MySQL, HTML, CSS, JavaScript, and Git to support university administrative workflows. • Build database-backed forms and interfaces involving relations schema design, CRUD operations, validation, timestamps, status tracking, and user relations. • Troubleshoot applications and database issues, test fixes, and communicate solutions to both technical and non-technical users.	
Association for Computing Machinery - TAMUSA	2025-2026
Fundraising Director	
• Coordinated fundraising, community outreach, and campus engagement for the ACM student chapter. • Helped organize fundraising for major university activities including Lights of Esperanza and Festival de Cascarones. • Represented the organization through community and student outreach and technology-focused speaking engagements. • Received TAMUSA's Fundraiser of the Year Award and Student Organization Community Service Award.	

PROJECTS

Weather Data Pipeline - MySQL SQL Bash Linux/WSL cron	
• Built an automated pipeline to load weather data into MySQL, moved staged records into a destination table, log processing activity, and archive processed input files. • Scheduled recurring data processing with cron and diagnosed database connectivity, permissions, file-loading, and duplicate-record issues.	
Voter Data Integrity & Audit System - MySQL SQL	
• Designed relational tables using primary keys, foreign keys, check constraints, and validation rules to maintain voting-data integrity. • Created MySQL triggers to enforce voting rules and record database changes for auditing and troubleshooting.	
Suggestion & Audit Form Generators - PHP MySQL HTML CSS	
• Built database-backed internal applications for collecting, displaying, and managing university records. Designed schemas and workflows involving auto-generated IDs, timestamps, status values, user associations, input validation, and CRUD operations.	
HB2504 Faculty Profile Image Crop Tool - JavaScript PHP Bootstrap Cropper.js HTML CSS	
• Built an image-cropping workflow for faculty profile photos using Cropper.js and Bootstrap. • Added client-side validation and converted cropped images into upload-ready JPEG files.	

SUMMARY

Computer science student with hands-on experience developing PHP/MySQL applications, designing relational databases, automating data workflows, and troubleshooting full-stack systems in a university Web Services environment. Experience with SQL, Python, PHP, JavaScript, Git, database design, and application development.
